Project Planning Phase

Milestone and Activity list

Date	02-November-2022
Team ID	PNT2022MID14821
Project Name	DemandEst - AI powered Food Demand Forecaster
Maximum Marks	8 Marks

Completed Tasks:

MILESTONES	ACTIVITY	DESCRIPTION
Ideation phase	Literature survey	Literature survey on selected project and gathering information.
	Empathy map	Prepare empathy map to capture the user pains and gains, prepare a list of problem statement.
	Ideation	Organising the brainstorming session and prioritise the top three ideas based on feasibility hand importance.
Project design phase 1	Proposed solution	Prepare proposed solution document which includes novelty, feasibility of ideas, business model, social impact, scalability of solution.

Problem solution fit	Prepare problem solution fit Documents.
Solution architecture	Prepare solution architecture document.

Project design phase 2	Customer journey map	Prepare customer journey map to understand the user interactions and experience with the application.
	Functional requirements	Prepare functional and non- functional necessity document.
	Data flow diagram	Prepare data flow diagram and user stories
	Technology architecture	Draw technology architecture diagram
Project planning phase	Milestones and activity list	Prepare milestones and activity list of the project.
	Sprint delivery plan	Planning of sprints
Pre-Requisites	In Order To Develop This Project, We Need To Install Following Software's/Package	Anaconda Navigator
	To Build Machine Learning Models You Must Require The Following Packages	Numpy Pandas Sicikit-learn Matplotlib and Seaborn Flask
Dataset Collection	Collect The Dataset or Create The Flask	train.csv test.csv

		fulfilment_center_info.csv meal_info.csv
Data Pre-Procesing	Importing The Libraries	Pandas

	NumPy
Reading The Dataset	Read_csv()
Exploratory Data Analysis	train.head() test.head()
Checking For Null Values	train.ismull().sum()
Reading And	meal_id
Merging.csv	center_id
Files	
Droping Columns	center_id meal_id
	trainfinal
Label Encoding	scikit_learn trainfinal.head()
Data Visualization	Data visualization is where a given data set is presented in a graphical format
Splitting The Dataset	homepage_featured
into	emailer_for_promotion
Dependent And	op_area cuisine
Independent Variable	city_code region_code

	Split The Dataset Into	train_test_split
	Train Set And Test Set	Train Dataset Test
		Dataset test_size
		train_size
		train_test_split
Model Building		There are several Machine
	Train And Test Model	learning algorithm to be used
	Application	depending on the data you are
		going to process such as
		images,sound,text and
		numerical values.
		We're going to use x_train and
	Model Evaluation	y_train obtained above in
		train_test_split section to train
		our regression model.
	Save The Model	After building the model we
		have to save the model.
	Predicting The Output	Here, we are creating X_test
	Using The Model	which are using to test the
		model to predict the number
		of orders by giving input to the
		model build.
Application Building	Create An HTML File	We use HTML to create the
		font-end part of the web page
	Build Python Code	Let us build flask file 'apply.py
		which is a web framework
		written in python for server -
		side scripting.
	Run The App	Run the application from
	''	

Register For IBM Cloud

Train The Model On IBM

anaconda prompt.

Create IBM Account

Train The ML Model On	Watch The Video To Train The
IBM	Machine Learning Model On
	IBM Watson.
Integrate Flask With	Watch The Video To Integrate
Scoring End Point	The Scooring Endpoint To The
	Flask

Remaining Tasks:

MILESTONES	ACTIVITY	DESCRIPTION
Project Development Phase	Project Development	In this activity are expected to
	Delivery Of Sprint-1	develop & submit the
		developed code by testing it.
	Project Development	In this activity are expected to
	Delivery Of Sprint-2	develop & submit the
		developed code by testing it.
	Project Development	In this activity are expected to
	Delivery Of Sprint-3	develop & submit the
		developed code by testing it.
	Project Development	In this activity are expected to
	Delivery Of Sprint-4	develop & submit the
		developed code by testing it.
